IMPACT

# Politecnico di Torino past experiences and future perspectives in Research and Innovation

CRP, Budapest, 14 September 2019

# International framework

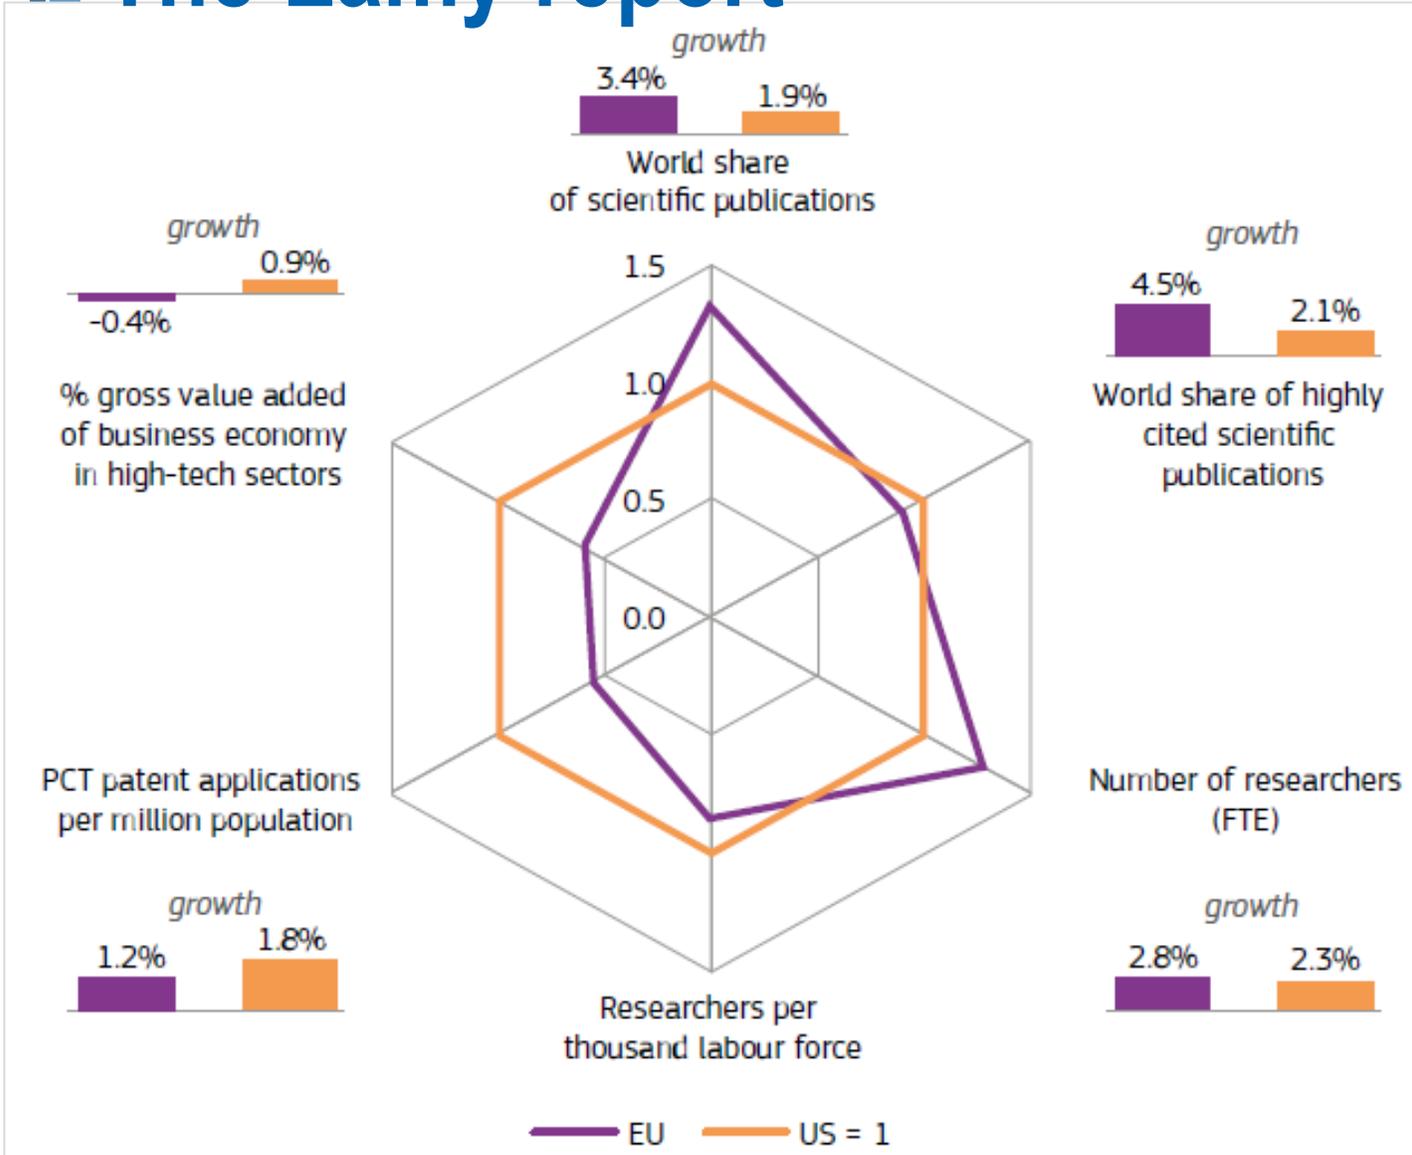

## UN SDGs

## Horizon Europe

PILLAR I: OPEN SCIENCE	PILLAR II: GLOBAL CHALLENGES AND INDUSTRIAL COMPETITIVENESS	PILLAR III: OPEN INNOVATION
European Research Council (ERC)	Joint Research Council (JRC)	European Innovation Council (EIC)
Marie Skłodowska-Curie Actions (MSCA)	5 Clusters: <ul style="list-style-type: none"> <li>Health</li> <li>Inclusive and Secure Societies</li> <li>Digital and Industry</li> <li>Climate, Energy and Mobility</li> <li>Food and Natural Resources.</li> </ul>	Support to innovation ecosystems
Research Infrastructures (RI)		European Institute of Innovation and Technology (EIT)
<b>PART IV: STRENGTHENING THE EUROPEAN RESEARCH AREA</b>		
Spreading Excellence (Teaming, Twinning, ERA Chairs, COST)		
Reforming and enhancing the European R&I system		

# The Lamy report

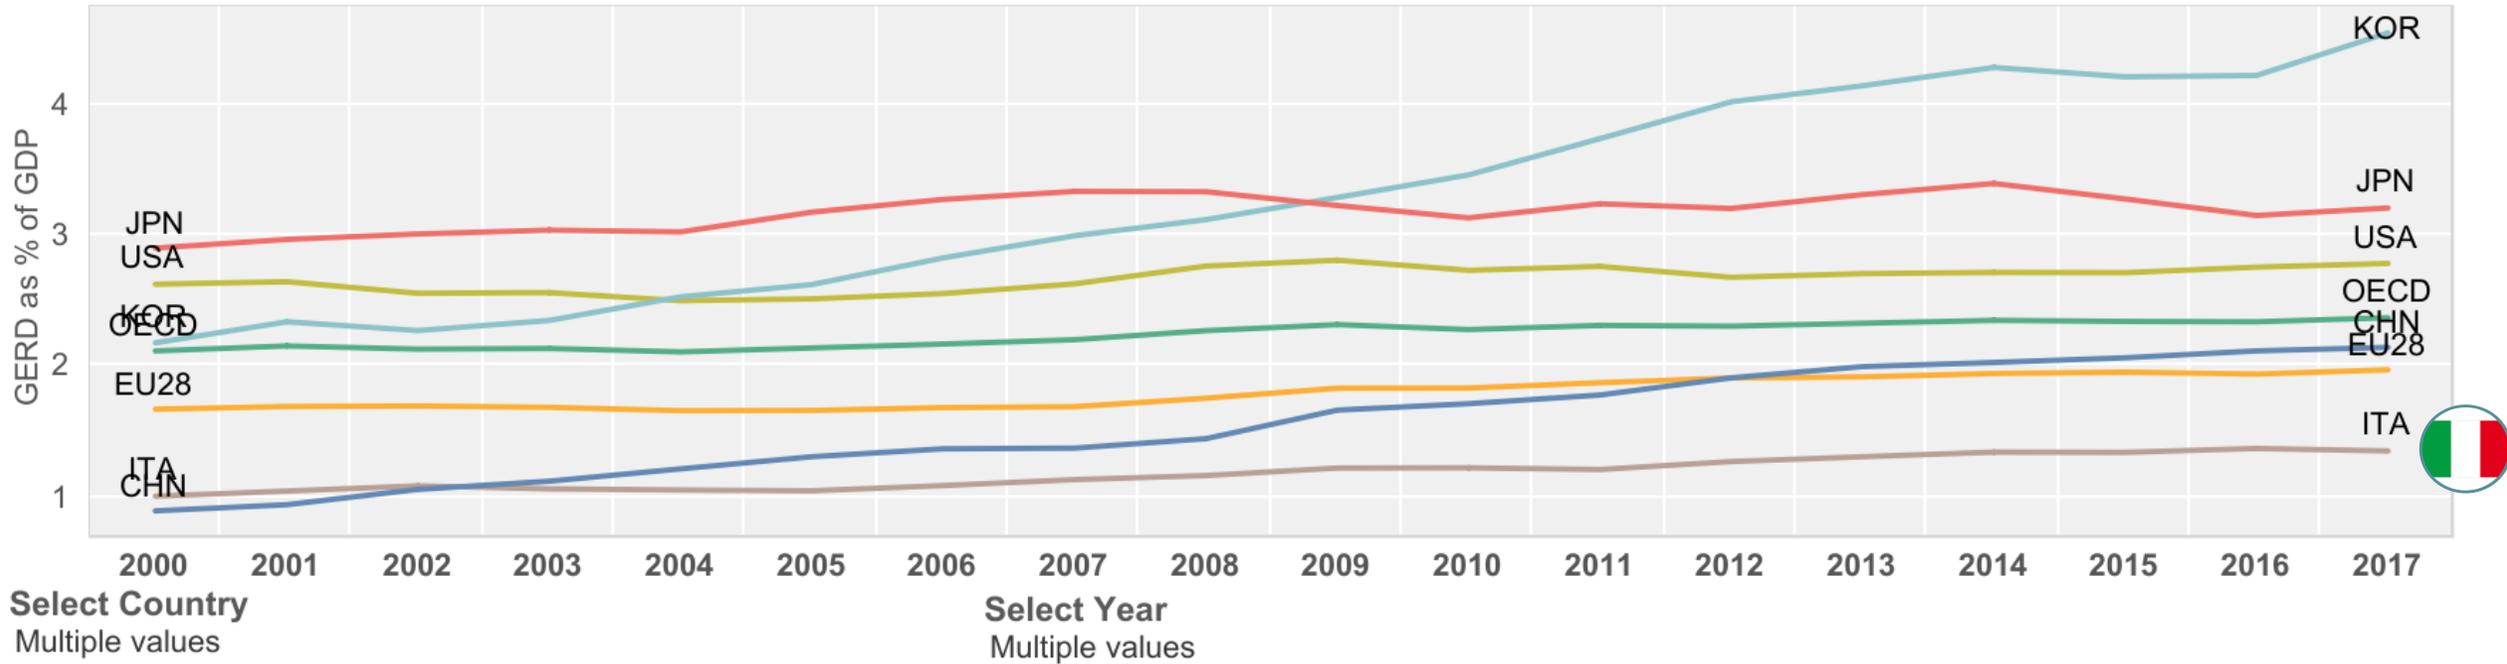

Comparative and growth rates of scientific publications, highly-cited scientific publications, researchers, patent applications and valued-added of high-tech sectors in the EU and the USA.

(Source: European Commission, DG Research and Innovation. Data: Eurostat, OECD, CWTS based on Web of Science database)

# Expenditure on R&D (% of GDP)

R&D Intensity in OECD countries and other economies

Source: OECD estimates based on OECD Main Science and Technology Indicators Database, August 2019.

# Italian and local context

- Italy and in particular the **Turin area**, are deeply involved in global transformations and have to tackle them from a difficult situation.
- Social and economic bases are being undermined by severe **demographic decline**, an **imbalance** between emigration and immigration of **young graduates**, **sluggish productivity growth** in different economic sectors.

*The result is a clear responsibility to work to the benefit of the society at territorial and national level.*

# PoliTo human capital

## Teaching Staff

**230** Full Professors

**370** Associate Professors

**300** «Researchers»

**33.500**

Students enrolled in Bachelor's and Master's degree programmes

**~15 %**

International students in total

**5.300**

Students enrolled in the first year (**applications ~ 2x, and growing**)

## Administrative Staff

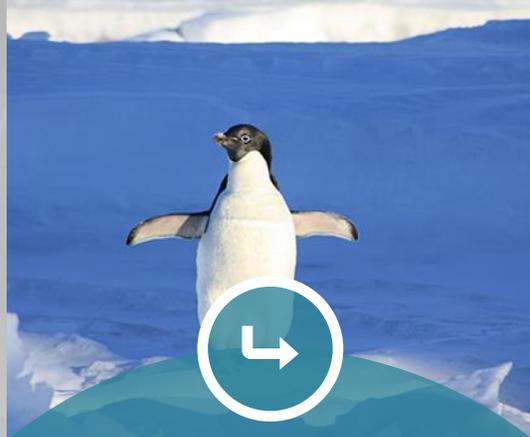

**~880** Staff members

**650+**

PhD candidates

# Levels and organisation of research

Individual researcher

Departmental Research Group

Department

InterDepartmental Centre(s)

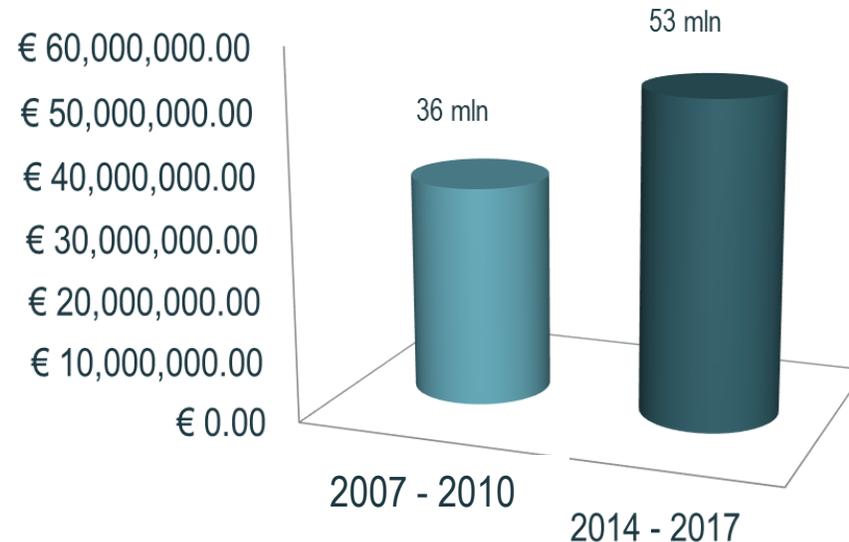

Platform(s)

# PoliTo research performance indicators

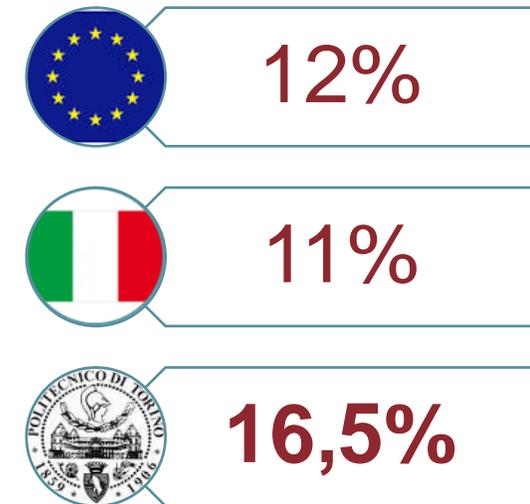

## Citations per publication (2013-2017)

	<b>6.1</b>
	<b>6.2</b>
	<b>5.2</b>

## Funding FP7 vs H2020 (1<sup>st</sup> 4 years)

## Success rate in H2020 proposals (2014-2017)

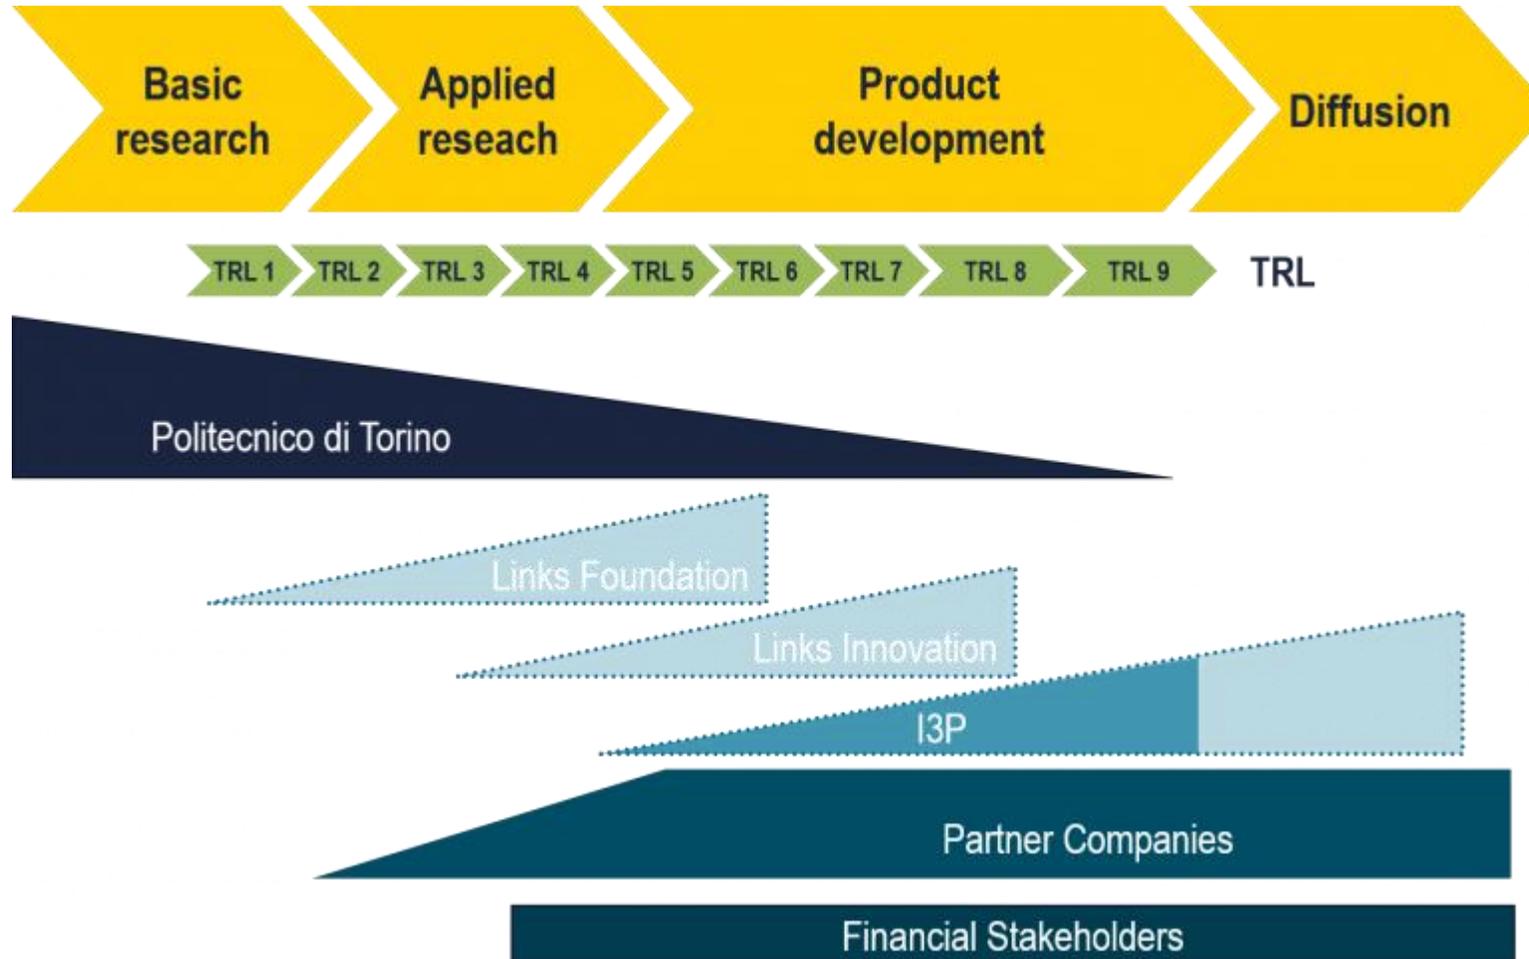

# The new challenges

- Support to **multidisciplinary research** activities and cross-contamination, also through the advancement of the organizational model adopted by the **Interdepartmental Centres**.
- Progressive diffusion of the principles of **Open Science** for a wide knowledge sharing and dissemination of the research results and data, as well as of the **Responsible Research and Innovation**
- Integration between the different phases of research and third mission activities

# The PoliTo contribution to the innovation value chain

See also the CESAER white paper on "ROLE OF UNIVERSITIES OF SCIENCE & TECHNOLOGY IN INNOVATION ECOSYSTEMS, by T. Bedford et al., 2018

# The Third Mission (\*) over time

## Analysis

- Politecnico di Torino has always recognized the fundamental importance of its role in the activities related to the "third mission" of a university and actively supported the development of Piemonte and Italy by cooperating with industry in the different phases of our history

(\*) To have a relevant impact on society

## Actions

Two core strategic objectives:

- to **increase the resources available for the University**
- to **contribute to the development of our territory and country**

Two main directions:

- the strengthening of the innovation value chain
- working in fields that are still relatively unexplored by our University, dealing with cultural promotion, communication and public engagement

# Third mission actions

- IPR management to increasingly support researchers
- achieve a critical mass of the **patent portfolio**
- foster **Proof of Concept** initiatives
- Support the creation of innovative enterprises → I3P incubator (1999, 1<sup>st</sup> in Italy) spin-offs and start-ups
- attract **venture capital** funds
- Achieve effective integration into the innovation ecosystem that we are building around our University

# **Terza Missione: insieme di attività con le quali le università entrano in interazione diretta con la società\***

## **a) Terza Missione di valorizzazione economica della conoscenza**

OBIETTIVO: favorire la crescita economica, attraverso la trasformazione della conoscenza prodotta dalla ricerca in conoscenza utile a fini produttivi.

- gestione della proprietà intellettuale,
- la creazione di imprese,
- la ricerca conto terzi (rapporti ricerca-industria)
- gestione di strutture di intermediazione e di supporto, in genere su scala territoriale.

Margini di attenzione: la conoscenza prodotta dal sistema pubblico di ricerca assume la natura di un bene privato. Da qui nascono delicati problemi di regolazione e di definizioni normative e operative.

## **b) Terza Missione culturale e sociale.**

OBIETTIVO: Produzione di beni pubblici che aumentano il benessere della società con contenuti:

- culturale (eventi e beni culturali, gestione di poli museali, scavi archeologici, divulgazione scientifica),
- sociale (salute pubblica, attività a beneficio della comunità, consulenze tecnico/professionali fornite in équipe),
- educativo (educazione degli adulti, live long learning life long learning, formazione continua) o di consapevolezza civile dibattiti e controversie pubbliche, expertise scientifica).

Per la fruizione di tali beni non è previsto, in linea generale, il pagamento di un prezzo, o in ogni caso di un prezzo di mercato.
